

## Description

The Maxitrol RV20LSF-3L6-0009 is a Rubber Seat Poppet Gas Regulator with Integral Vent Limiting Orifice. Used to have precise control gas flow on main burners and perfect for main burner and pilot load applications.

RV20LSF-3L6-0009 regulator pipe size measures 3/8" Loxit x 3/8" NPT and has an integral vent limiting orifice with a 1/8" NPT tapping on left side. The outlet pressure is nonadjustable and factory set at 3" W.C. Operating maximum inlet pressure is up to 1/2" PSI. Applicable to equipment that uses Natural Gas.

Maxitrol RV poppet regulators are suitable for home or commercial cooking appliances that use liquefied petroleum gases, LP gas-air mixture, manufactured, mixed gases, and natural gas. Provides efficient operating performance and they are safe to use with CSA certification. Made of aluminum die-casting material making the regulator durable. All RV poppet regulators except models with the "D" suffix can be installed in any position.
